Summary

A passionate Full-Stack Developer with 1 Year experience in building dynamic, scalable web applications using modern technologies. Proficient in front-end development with React.js, Tailwind CSS, and state management tools like Redux Toolkit. Skilled in back-end development using .NET, Entity Framework Core, and SQL Server for designing robust database solutions. Adept at following clean coding principles, implementing object-oriented programming, and utilizing RESTful APIs to deliver high-performance solutions. Committed to continuous learning and excelling in collaborative.

Education

Bachelor Degree / Computer Science, *Zagazig University*

Skills

- **Programming Languages: Javascript (ES6) | C# (OOP)**

- **Front End Development: HTML | CSS | Tailwind CSS | Bootstrap | React.js, Redux Toolkit | React Query**

- **Database Management: MS SQL Server | Entity Framework Core (EF Core)**

Professional Experience

- Worked On – **Development Solutions Company As Full-Sack Developer** **(2024/07 – Present)**

- Worked on - **Furniture Store (E-Ecommerce) As Front End Developer**: It's an E-commerce website for selling and showing furniture of different types using different technologies such as **React.js**, **Redux Toolkit**, **React Router**, **React Query**, **Tailwind Css**, **Axios**, **Daisy UI**, **Css**, Also register and login accounts as new user or guest, Also with filter for all products, Also added themes, Attention was paid to speed and performance so I used (**React Query**) and **(Vite)** build too

- Worked on - **Restaurant Reviews**(Graduation Project) **As Front End Developer :** It's Website for reviewing the restaurants and showing

it's locations in the **map** using (**Leaflet Mapbox api**) , Also you can as admin add new restaurant and remove and edit using **HTML, CSS, JAVASCRIPT, BOOTSTRAP, PHP, LEAFLET MAP**

Projects: These are some of my projects => 4 P / +15 (P & Mini Apps)

- **Furniture Store(E-Ecommerce):**It's a website for selling the furniture with their details, Also with the Login and Register pages for Authentication , Also filter the products by name and type and price, also with two theme, And Cart page.
  Tech: **REACT. JS | REDUX TOOLKIT | REACT QUERY | REACT ROUTER | CSS | TAILWIND CSS | AXIOS | DAISY UI | GITHUB.**
  Github-Link

- **Restaurant Reviews (Graduation Project) AS Front End Developer:** It's a website for reviewing the restaurants and showing it's locations on Map Box using **Leaflet Map Api,** With Single page for each restaurant which contains the location for the specific restaurant in the map and more details for it such as the opening hours and the reviews in the comments from users and his real rate on google maps and I work now in the same website but using React.js and Tailwind Css etc.. To change it to react app, also you can add and remove and edit restaurant and also add comment on the restaurant page.
  Tech: **HTML | CSS | JAVASCRIPT | BOOTSTRAP | PHP | LEAFLET MAP | GITHUB**
  Github-Link

- **MyDotNetPortfolio (Asp.NetCore Application MVC) As Full-Stack Developer:** It's website as portfolio for anyone with database for the person data.
  Tech: **HTML | CSS | JAVASCRIPT | SCSS | C# | EFCore | MS SQL SERVER | GITHUB**

Github-Link

- **Spacetoon Store (Handmade Store) As Front End Developer: It's website for showing the handmade works with different types.**
  Tech: **HTML | CSS |VANILLA JAVASCRIPT |FONT AWESOME | BOOTSTRAP LIBRARY | GITHUB**
